

STEVEN FERNANDEZ

IT Technician | IT Support | Help Desk | Cybersecurity

Jackson, NJ | (908) 630-7085 | sjfernandez7@outlook.com | linkedin.com/in/stevenjfernandez31 | github.com/sjfernandez31

PROFESSIONAL SUMMARY

CompTIA A+, Network+, and ITIL 4 Foundation certified IT Technician with hands-on experience in PCI DSS compliance, ServiceNow ticketing, VoIP troubleshooting, and Tier 1/2 technical support.

Strong problem-solving ability and problem-solving skills, attention to detail, and written and verbal communication skills demonstrated across high-volume support roles. Builder of AegisOS, a live AI-powered cybersecurity platform. Bilingual English/Spanish with strong interpersonal skills.

CERTIFICATIONS

- CompTIA Network+
- CompTIA A+
- CompTIA CIOS (IT Operations Specialist)
- ITIL 4 Foundation
- CompTIA Security+ (In Progress)

TECHNICAL SKILLS MATRIX

- **Help Desk & Support:** Tier 1/2 Troubleshooting, ServiceNow Ticketing, Incident Management, Remote Desktop, Hardware/Software Diagnostics, Error Reporting
- **Networking & Systems:** TCP/IP, DNS/DHCP, Subnetting, OSI Model, VoIP Administration, Windows 10/11, Linux (Ubuntu/Kali), Active Directory
- **Cybersecurity & Compliance:** PCI DSS Compliance, Network Security, SIEM Basics, Wireshark Traffic Analysis, Access Control, Safety Standards
- **AI & Dev Tools:** GPT-4o API Integration, Prompt Engineering, Git/GitHub, Vercel Deployment, Technical Documentation

TECHNICAL PROJECTS

AegisOS — Full-Stack AI-Powered Cybersecurity Platform

Live Project: aegis-os-orcin.vercel.app | 2026

- Designed and deployed a live Progressive Web App (PWA) hosting 16 active security tools tailored for home users and small businesses.
- Integrated GPT-4o via OpenAI API to drive core features: real-time threat analysis, phishing detection, email header inspection, CVE lookup, and incident response.
- Produced detailed technical documentation and error reporting logs; shipped on Vercel with offline caching, mobile-first UI, and secure server-side API key management.

IT Support Home Lab — Active Directory & Help Desk Simulation

Personal Lab | 2026–Present

- Built a multi-VM environment using VMware Workstation Pro with Windows Server 2022 and Windows 10 to simulate an enterprise IT support environment.
- Configured Active Directory domain (support.local), created OUs, user accounts, and group policies mirroring real-world help desk workflows.
- Documented lab procedures as professional technical manuals with attention to detail to reinforce enterprise-level troubleshooting and system administration skills.

Blue Team Home Lab — Threat Detection & Log Analysis

Personal Lab | 2026–Present

- Building a multi-VM environment using Kali Linux (attacker) and Windows (defender) to safely simulate and detect real-world attack techniques.
- Practicing continuous threat detection, network log analysis, and incident response frameworks in an isolated environment.

Cybersecurity Fundamentals Lab — Network & Security

WGU Academic Lab | Jan 2024–May 2024

- Configured a small-scale network environment utilizing custom IP addressing, subnetting, and connectivity testing to simulate enterprise diagnostics.
- Analyzed live network traffic using Wireshark to identify performance bottlenecks and security anomalies across OSI Layers 1–3.

PROFESSIONAL EXPERIENCE

Handshake

AI Prompt Trainer (Contract) | Nov 2025–Present

- Evaluate and refine AI-generated technical and general responses to improve large language model accuracy, tone, and technical usefulness.
- Design and test rigorous system prompts to reduce output ambiguity, applying problem-solving skills and academic principles from generative AI coursework.
- Identify, document, and flag edge cases, factual errors, and structural formatting bugs; maintain detailed error reporting to optimize output quality.

ACD Direct

Customer Support & Compliance Specialist (Contract) | Jul 2025–Jun 2026

- Handled high-volume inbound technical and customer support inquiries under strict PCI DSS compliance protocols to protect payment card data.
- Logged, categorized, and tracked technical support interactions natively within ServiceNow, maintaining precise incident records and escalation chains.
- Administered and troubleshoot end-user VoIP connectivity and audio quality issues; communicated resolutions clearly through strong written and verbal communication.

Penske Logistics & Cardinal Logistics

Logistics & Compliance Operator | Jan 2015–Dec 2025

- Maintained detailed technical documentation and compliance logs (ELD/DOT), developing deep habits in rigorous record-keeping, attention to detail, and data integrity.
- Operated independently under tight, SLA-driven schedules, applying problem-solving skills and interpersonal communication to manage priorities directly transferable to help desk environments.

EDUCATION

Western Governors University | B.S. Cybersecurity & Information Assurance | Expected Graduation: Dec 2027

Ocean County College | A.S. General Studies (Computer Science focus) | Graduated: Summer 2026

LANGUAGES

English: Native Proficiency | Spanish: Fluent Proficiency
